PROJECTS

MITO – Intelligent AI Voice Assistant

Developed a desktop-based intelligent AI voice assistant using **Python**, featuring **real-time speech recognition, wake-word detection, and natural language interaction**. Built with a modular architecture separating frontend GUI and backend logic, supporting voice commands, automation tasks, and conversational AI. Integrated text-to- speech, emotion-aware responses, and scalable components for future AI and system-level enhancements.

FLOWDESK – Autonomous Customer Support Platform

Developed an AI-driven customer support automation system using **FastAPI**, featuring **ticket generation, email handling** and **threaded conversations**. Implemented a **RAG-based pipeline** with **LangChain** and **LLaMA 3** for policy-aware responses, along with sentiment-based escalation to route complex queries to human agents.
